Status of Application Request

Title #1

Title: GNU C-Graph

Claimant Name: Adrienne Gaye Thompson

Payment Method: Credit Card

Date of Application: January 2016

Delivery Confirmation?: no

Service Request Number: 1-3008018831

Additional Comments: Reference: Case No. 1-3008018831 GNU C-Graph Dear Register of Copyrights: I refer to my application for copyright registration of the captioned software, "GNU C-Graph" case number 1-3008018831, filed online 2 January 2016 at - more than one year ago. Your guidelines prescribe a 6-10 month period for processing copyright registration applications filed through your Electronic Copyright Office service. Please observe that I amended the application by letters dated 18 January 2016 and 16 February 2016 (delivered by Federal Express A/W Bill Nos. 809264268810 and 808584025210) and also emailed on 23 February 2016, after speaking by telephone with your officer Mr. William Nelson (copy included below). I believe my application is being obstructed by criminal professors involved with the theft of the underlying work. Please see my letter to the Copyright Office concerning my GATT application for the latter . I insist that you advise me, without delay, of the status of my applications, and when the registration procedures will be concluded. Sincerely Adrienne Gaye Thompson GNU C-Graph Inventor and Author CC * FBI Tips and Leads * FBI-Boston Email of 23 February 2016 to :

===== Dear Mr. Nelson Re: GNU C-Graph 2.0 application case No. 103008018831 I have attached a copy of my updated amendments to the captioned application. You may also find a copy online at : Although I deposited the manual (sent by FedEx A/W bill 808584025210 18 January 2016) as copyrightable work, it should have been explicitly recorded under the "Author Created" and "Limitation of Claim / Material Included" sections of the application. As the attached letter indicates, the updated amendments are accordingly as follows: 1.Author Created: Computer Program including animated splash screen artwork and user manual. 2.Limitation of Claim a.Material Excluded: Computer Program (structure, sequence, organisation, and other non-literal elements of underlying Fortran 77 program "Hthesis" case no. 1-3008147235). b.Material Included: Computer Program; Artwork (animated splash screen); Text (user manual). Thank you for your assistance. Please contact me should you require any further clarification. Regards Adrienne G. Thompson
